

DESCRIPTION

DUO BOX Mod. DUPLICATORE

This is an electrically controlled car parking system without shaft and with hydraulic handling, for two cars, one above the other, which can be inserted in any environment, both indoors and outdoors, in individual garages or in sets.

It consists of a single platform with two lateral columns positioned in such a way as not to obstruct the opening of the gates, containing the thrust cylinder and the chain which implement raising and lowering of the platform. The latter may be inclined and adjusted to any height on the basis of available space and the vehicles to be parked.
